Reimbursement Codes

1. CPT or Q-Codes

36569: Placement of a catheter in subclavian or other vein, percutaneous, over age 5.

36410: Venipuncture necessitating physician or qualified non-physician practitioner's skill

76937: Ultrasound insertion of a vascular access device with the aid of ultrasound (CPT/HCPCS)—*Note: requires "dynamic" technique: "...uses ultrasound during line placement. A recorded image of the procedure is required for coding."*

2. HCPCS Code: For The POWERWAND®

C1751 – Catheter, Infusion, Inserted Peripherally, Centrally or Midline (other than hemodialysis)

"Level II of the HCPCS is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes, such as ambulance services and durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) when used outside a physician's office. Because Medicare and other insurers cover a variety of services, supplies, and equipment that are not identified by CPT codes, the level II HCPCS codes were established for submitting claims for these items. The development and use of level II of the HCPCS began in the 1980's. Level II codes are also referred to as alpha-numeric codes because they consist of a single alphabetical letter followed by 4 numeric digits, while CPT codes are identified using 5 numeric digits."

3. Uniform Bill Code

UB-92: 270 (Price: \$800) Midline catheter kit (ref: [Infusion Nursing: An Evidenced-Based Approach 2010](#))

Product Code	Description	Qty / Box
72390	POWERWAND™ Maximum Barrier Kit, 4Fr (8cm)	10
